Editors Preface

Dear Water Professionals

Welcome to TECHNOSCAPE²³

As this journey unfolds, we share our greetings to each one of you who has joined on this expedition: TECHNOSCAPE²³ – 5th International Conference on 'Sustainable Technologies for Water and Wastewater Treatment'. A journey that talks about what we stand for, what we believe in, and what we aim to do. TECHNOSCAPE, since its inception in 2013, has held unwavering courage and strength to bring forth an issue that stands with equal grit, if not more - the sustainability of water.

This platform that brings together academicians, researchers, policy makers, agronomists, and young water leaders is one to transform ourselves from ideators to impactors, from researchers to research-entrepreneurs, and from exploiters to protectors.

Team TECHNOSCAPE²³ has organized each and every event with utmost care, symbolising the same for our world, showcasing their beliefs necessities, the knowns, and the unknowns.

As you travel this journey, may we all realise the intricacies to be unravelled for sustainability of our precious element and the responsibilities that lies on our shoulders. Embrace yourself with knowledge and empower yourself with actions.

Be a TECHNOSCAPE. The world awaits as TECHNOSCAPE²³ unfurls.

We would like to express our profound gratitude to Science and Engineering Research Board (SERB) for their generous financial assistance towards Technoscape²³ an "International Conference on Sustainable Technologies for Water and Wastewater Treatment". Their commitment to advancing scientific endeavors has significantly contributed to the success of this event. We acknowledge the support which enabled the knowledge-sharing possible, enhancing the global landscape of research and innovation.
